Dump's Outline: Grade 01 - 02

1. **Introduction to AI**
   - What is AI?
   - AI Around Us
   - How AI Helps Us in Daily Life
2. **Smart Machines**
   - What are Smart Machines?
   - Robots vs. Computers
   - Talking to Machines: Voice Assistants (e.g., Alexa, Siri)
3. **Basics of Machine Learning**
   - What is Learning? How Do Humans Learn?
   - How Do Machines Learn?
   - Teaching a Machine New Things
4. **AI and Games**
   - How AI Plays Games (e.g., Chess, Tic-Tac-Toe)
   - AI in Video Games
5. **AI and Creativity**
   - Can AI Be Creative?
   - AI in Art and Music

6. **Responsible AI – Being Smart with Technology**

- What is Responsible AI?
- Why is Responsible AI Important?
- How Can We Use AI Responsibly?

Dump on Artificial Intelligence

1. **What does AI stand for?**

   a) Animal Intelligence

   b) Artificial Intelligence

   c) Amazing Inventions

   Answer: b) Artificial Intelligence

2. What does AI help machines do?

a) Sleep

b) Think and learn

c) Eat food

Answer: b) Think and learn

3. Which of these is an example of AI?

a) A pencil

b) A talking robot

c) A tree

Answer: b) A talking robot

4. What is AI often compared to?

a) A magic carpet

b) A human brain

c) A treasure chest

Answer: b) A human brain

5. Which device uses AI to play music when asked?

a) Alexa

b) Toaster

c) Clock

Answer: a) Alexa

6. AI helps machines to...

a) Dance

b) Think and make decisions

c) Eat snacks

Answer: b) Think and make decisions

7. What can AI suggest when watching YouTube?

a) A new cartoon video

b) A new pencil

c) A new book

Answer: a) A new cartoon video

8. Which one is not an AI tool?

a) Smart speaker

b) School bag

c) Self-driving car

Answer: b) School bag

9. AI helps in...

a) Growing trees

b) Recommending movies

c) Eating dinner

Answer: b) Recommending movies

10. Who can use AI?

a) Only adults

b) Only scientists

c) Everyone

Answer: c) Everyone

11. Which smart device can answer your questions?

a) Fridge

b) Smart speaker

c) Chair

Answer: b) Smart speaker

12. What does AI help doctors with?

a) Cooking food

b) Finding diseases

c) Cleaning rooms

Answer: b) Finding diseases

13. How does AI help farmers?

a) By planting seeds

b) By predicting weather

c) By cutting trees

Answer: b) By predicting weather

14. What does AI in Netflix do?

a) Suggests movies

b) Cleans the TV screen

c) Changes channels

Answer: a) Suggests movies

15. Which car technology uses AI?

a) Self-driving car

b) Toy car

c) Bicycle

Answer: a) Self-driving car

16. Where can we find AI?

a) In our homes

b) In schools

c) Everywhere

Answer: c) Everywhere

17. How does AI help teachers?

a) By checking homework

b) By making coffee

c) By cleaning desks

Answer: a) By checking homework

18. AI is like a...

a) Wizard

b) Smart brain

c) Candy machine

Answer: b) Smart brain

19. What do we call AI that talks to us?

a) Voice assistant

b) Weather assistant

c) Dance assistant

Answer: a) Voice assistant

20. AI helps drivers avoid...

a) Rain

b) Traffic jams

c) Sunshine

Answer: b) Traffic jams

21. What can a smart vacuum cleaner do?

a) Wash clothes

b) Clean floors by itself

c) Cook food

Answer: b) Clean floors by itself

22. What can a smart fridge remind you about?

a) Your homework

b) Buying milk

c) Playing games

Answer: b) Buying milk

23. How are smart machines different from regular machines?

a) They can think and learn

b) They are shiny

c) They are big

Answer: a) They can think and learn

24. Which of these is a smart machine?

a) Rocking chair

b) Robot vacuum cleaner

c) Plastic bottle

Answer: b) Robot vacuum cleaner

25. Which device listens to your commands?

a) Microwave

b) Smart speaker

c) Shoe

Answer: b) Smart speaker

26. Robots can...

a) Dance

b) Talk

c) Both a and b

Answer: c) Both a and b

27. Computers stay...

a) In one place

b) Everywhere

c) In the sky

Answer: a) In one place

28. Robots can...

a) Walk and move

b) Sleep

c) Cook breakfast

Answer: a) Walk and move

29. Which of these is a robot?

a) Toy robot dog

b) Wooden spoon

c) Flower pot

Answer: a) Toy robot dog

30. Computers can help with...

a) Typing homework

b) Washing dishes

c) Running

Answer: a) Typing homework

31. Which voice assistant can answer your questions?

a) Siri

b) Doorbell

c) Basketball

Answer: a) Siri

32. What can Alexa do?

a) Sing songs

b) Run a race

c) Fly

Answer: a) Sing songs

33. Which question can you ask Siri?

a) "What is the weather today?"

b) "Can you play football?"

c) "Do you like candy?"

Answer: a) "What is the weather today?"

34. Voice assistants can...

a) Answer questions

b) Fly airplanes

c) Cook food

Answer: a) Answer questions

35. Which AI assistant tells bedtime stories?

a) Siri

b) Alexa

c) Google Home

Answer: b) Alexa

36. AI voice assistants can understand...

a) Pictures

b) Voices

c) Smells

Answer: b) Voices

37. How do you talk to Siri?

a) Type on a keyboard

b) Say, “Hey Siri!”

c) Dance

Answer: b) Say, “Hey Siri!”

38. What should you never tell AI assistants?

a) Your favorite cartoon

b) Your home address

c) Your favorite food

Answer: b) Your home address

39. What can voice assistants set for you?

a) A bed

b) An alarm

c) A sandwich

Answer: b) An alarm

40. Are voice assistants helpful?

a) Yes

b) No

Answer: a) Yes

41. What does AI use to learn?

a) Magic

b) Data

c) Water

Answer: b) Data

42. How do humans learn?

a) Watching, listening and practicing

b) Sleeping

c) Eating candy

Answer: a) Watching, listening, and practicing

43. How do AI machines learn?

a) By looking at lots of examples

b) By sleeping

c) By playing games

Answer: a) By looking at lots of examples

44. What happens if AI sees 1,000 pictures of apples?

a) It eats them

b) It learns to recognize apples

c) It gets confused

Answer: b) It learns to recognize apples

45. What is an example of AI learning?

a) AI recognizing happy and sad faces

b) AI eating food

c) AI running fast

Answer: a) AI recognizing happy and sad faces

46. Why does AI need a lot of data?

a) To grow muscles

b) To learn patterns

c) To become sleepy

Answer: b) To learn patterns

47. What can AI learn from photos?

a) Colors

b) Shapes

c) Both a and b

Answer: c) Both a and b

48. AI uses data to...

a) Eat food

b) Make smart decisions

c) Jump high

Answer: b) Make smart decisions

49. What is AI training called?

a) Machine walking

b) Machine training

c) Machine learning

Answer: c) Machine learning

50. Teaching AI is like...

a) Training a pet

b) Painting a wall

c) Sleeping

Answer: a) Training a pet

51. What game can AI play very well?

a) Soccer

b) Chess

c) Hide and Seek

Answer: b) Chess

52. AI can plan moves in which game?

a) Tic-Tac-Toe

b) Cooking game

c) Tag

Answer: a) Tic-Tac-Toe

53. What makes AI good at games?

a) Speed

b) Planning ahead

c) Luck

Answer: b) Planning ahead

54. Who controls the computer players in video games?

a) A teacher

b) AI

c) A cat

Answer: b) AI

55. AI characters in games are called...

a) Virtual pets

b) Non-Player Characters (NPCs)

c) Robots

Answer: b) Non-Player Characters (NPCs)

56. What does AI do in racing games?

a) Drive cars

b) Eat snacks

c) Clean roads

Answer: a) Drive cars

57. In a treasure hunt game, who might control the enemies?

a) Humans

b) AI

c) Trees

Answer: b) AI

58. Why is AI fun in games?

a) It always loses

b) It makes games smarter and exciting

c) It makes you bored

Answer: b) It makes games smarter and exciting

59. Which board game can AI master?

a) Chess

b) Monopoly

c) Snake and Ladder

Answer: a) Chess

60. AI helps video games become...

a) More challenging

b) More boring

c) Less colorful

Answer: a) More challenging

61. Can AI create art?

a) Yes

b) No

Answer: a) Yes

62. What tool can AI use to make music?

a) Paintbrush

b) Piano

c) Both a and b

Answer: b) Piano

63. Which art can AI make?

a) Drawings

b) Music

c) Both a and b

Answer: c) Both a and b

64. What is an AI music tool?

a) DALL·E

b) AIVA

c) Calculator

Answer: b) AIVA

65. AI art tools can...

a) Suggest colors

b) Eat pencils

c) Sleep

Answer: a) Suggest colors

66. What does AI need to create art?

a) A description

b) A nap

c) Food

Answer: a) A description

67. AI can help writers by...

a) Creating stories

b) Cleaning books

c) Eating paper

Answer: a) Creating stories

68. What type of drawings can AI create?

a) Abstract art

b) Cartoons

c) Both a and b

Answer: c) Both a and b

69. Musicians use AI to...

a) Clean instruments

b) Compose music

c) Bake cakes

Answer: b) Compose music

70. What is AI like for artists?

a) A paintbrush

b) A creative helper

c) A toolbox

Answer: b) A creative helper

71. What does Responsible AI mean?

a) Using AI safely and kindly

b) Playing with AI all day

c) Ignoring AI

Answer: a) Using AI safely and kindly

72. Should we share personal info with AI?

a) Yes

b) No

Answer: b) No

73. What should you say to AI assistants?

a) Please and thank you

b) Be rude

c) Ignore them

Answer: a) Please and thank you

74. Should kids ask adults before using new AI tools?

a) Yes

b) No

Answer: a) Yes

75. If AI asks for your password, what should you do?

a) Share it quickly

b) Tell an adult

c) Ignore it

Answer: b) Tell an adult

76. What happens if AI makes a mistake?

a) Ignore it

b) Check with an adult

c) Turn it off

Answer: b) Check with an adult

77. What's an example of using AI for good?

a) Drawing art

b) Helping with homework

c) Both a and b

Answer: c) Both a and b

78. Can AI always tell right from wrong?

a) Yes

b) No

Answer: b) No

79. How should you treat AI devices?

a) With kindness

b) With anger

c) Ignore them

Answer: a) With kindness

80. Who should kids talk to if something feels wrong with AI?

a) A stranger

b) A parent or teacher

c) Nobody

Answer: b) A parent or teacher

81. Sarah wants to listen to her favorite cartoon song. She says, "Alexa, play my favorite song!" What happens next?

a) Alexa ignores her.

b) Alexa plays her favorite song.

c) Alexa starts dancing.

Answer: b) Alexa plays her favorite song.

82. Max wants to know the weather. He says, "Hey Siri, what's the weather today?" What happens next?

a) Siri ignores him

b) Siri tells him the weather forecast

c) Siri starts singing

Answer: b) Siri tells him the weather forecast

83. Emma asks Alexa to play her favorite cartoon theme song. Why does Alexa understand her request?

a) Because Alexa is magical

b) Because Alexa uses AI to understand her voice

c) Because Emma is loud

Answer: b) Because Alexa uses AI to understand her voice

84. Lily's mom uses Google Maps to avoid traffic. How does Google Maps know the fastest route?

a) By asking drivers

b) By guessing

c) By using AI to check traffic

Answer: c) By using AI to check traffic

85. Lily is playing a racing video game. The other cars in the game are driving very smartly and trying to win. Who controls the other cars?

a) Another player

b) AI technology

c) A robot

Answer: b) AI technology

86. Tom asks Siri, "What's the weather like today?" Siri responds with the weather forecast. How does Siri know the weather?

a) It guesses

b) It uses AI to check weather data

c) It looks outside

Answer: b) It uses AI to check weather data

87. Maria's smart refrigerator says, "You are running out of milk!" How did the fridge know this?

a) It tasted the milk

b) It used AI to check the milk level

c) It guessed

Answer: b) It used AI to check the milk level

88. Sam's robot toy dog can bark, walk, and follow him around. What helps the robot dog do these tasks?

a) Batteries

b) AI programming

c) Food

Answer: b) AI programming

89. Alex plays Tic-Tac-Toe on his tablet against the computer. The computer always makes smart moves. Why?

a) It cheats

b) It uses AI to think ahead

c) It guesses

Answer: b) It uses AI to think ahead

90. Emily wants to ask her smart speaker a question, but she shouts angrily. How should Emily talk to her smart speaker?

a) Politely say, "Alexa, can you help me?"

b) Shout louder

c) Ignore it

Answer: a) Politely say, "Alexa, can you help me?"

91. Jake is watching a video about animals on YouTube. After the video ends, YouTube suggests more animal videos. What helps YouTube suggest these videos?

a) AI understands Jake's interest

b) Magic

c) Luck

Answer: a) AI understands Jake's interest

92. Lily's classroom has a smartboard. Her teacher draws a shape, and the smartboard recognizes it as a triangle. How does the smartboard know?

a) It guesses

b) It uses AI to recognize shapes

c) It asks the teacher

Answer: b) It uses AI to recognize shapes

93. Sophia is playing a game where a cartoon robot gives her puzzles to solve. How does the robot know if Sophia solves the puzzle correctly?

a) It guesses

b) It uses AI to check her answer

c) It asks her friend

Answer: b) It uses AI to check her answer

94. David has a robot vacuum cleaner at home. It moves around and cleans the floor without bumping into walls. How does the vacuum cleaner do this?

a) Someone controls it

b) It uses AI to detect obstacles

c) It gets lucky

Answer: b) It uses AI to detect obstacles

95. Anna wants to create a colorful painting on her computer using an AI art tool. What should Anna do first?

a) Tell the AI tool what she wants to draw

b) Wait for the computer to draw automatically

c) Close the program

Answer: a) Tell the AI tool what she wants to draw

96. Noah's AI robot friend asks him, "What's your password?" What should Noah do?

a) Tell the robot the password

b) Ask an adult for help

c) Ignore the robot

Answer: b) Ask an adult for help

97. Emma is using an app where an AI tool helps her recognize animal pictures. The AI shows her a lion and says it's a cat. What should Emma do?

a) Teach the AI the correct answer

b) Ignore it

c) Turn off the app

Answer: a) Teach the AI the correct answer

98. John is playing a treasure hunt game on his computer. Every time he makes a move, the game adjusts the difficulty. What makes the game so smart?

a) Luck

b) AI technology

c) Magic

Answer: b) AI technology

99. Sarah's mom uses a weather app that says it will rain tomorrow. How does the app know?

a) It looks at the sky

b) It uses AI to check weather patterns

c) It guesses

Answer: b) It uses AI to check weather patterns

100. Olivia's class is learning with an AI-powered smartboard. The smartboard corrects her math problem instantly. How does it do this?

a) A teacher is secretly controlling it

b) AI understands math patterns

c) It guesses

Answer: b) AI understands math patterns
