Dump's Outline: Grade 03 - 04

1. **Introduction of AI**
   - Simple Definition of AI
   - AI in Our Daily Lives
2. **Human vs. AI**
   - Comparing Human and Machine Decision-Making
3. **Why is AI Cool?**
   - Describe the AI work
4. **How Does AI Learn?**
   - Explained the process of AI Learning
5. **AI Around Us**
   - AI technologies: Search Engine, Social Media, Self Driving Cars
6. **Advantages of AI**
   - Benefits of AI
7. **History of AI**
   - Timeline of AI

Dump on Artificial Intelligence

1. **What does AI do?**

   A) It plays games

   B) It helps machines learn from data

   C) It makes food

   D) It helps you sleep

   Answer: B) It helps machines learn from data

2. **Which of these is an example of AI?**

   A) A robot that helps clean your house

   B) A rock

   C) A book

   D) A teddy bear

   Answer: A) robot that helps clean your house

3. **What does AI in a self-driving car do?**

   A) It sings songs

   B) It drives the car without a driver

   C) It dances

   D) It talks to other cars

   Answer: B) It drives the car without a driver

4. **How does AI know what music you like?**

   A) It guesses randomly

   B) It learns from your past choices

   C) It watches TV

   D) It asks your friends

   Answer: B) It learns from your past choices

5. **What is one thing AI can help do in video games?**

   A) Make the game stop working

   B) Change the game rules

   C) Make the game more fun by adjusting difficulty

   D) Turn off the game

   Answer: C) Make the game more fun by adjusting difficulty

6. **How can AI help in shopping?**

   A) By giving you random things

   B) By suggesting products based on what you like

   C) By charging you more money

   D) By making the website slower

   Answer: B) By suggesting products based on what you like

7. **What can smart speakers like Amazon Echo or Google Home do?**

   A) Cook food

   B) Answer your questions and play music

   C) Help you study math

   D) Walk around the house

Answer: B) Answer your questions and play music

8. **What is AI used for in healthcare?**

A) To tell jokes

B) To help doctors by analyzing patient data

C) To run hospitals

D) To make medicine

Answer: B) To help doctors by analyzing patient data

9. **What is the main purpose of AI in self-driving cars?**

A) To decorate the car

B) To drive the car safely

C) To play music

D) To clean the car

Answer: B) To drive the car safely

10. **How does AI learn?**

A) By guessing answers

B) By looking at examples and data

C) By copying humans perfectly

D) By asking humans for answers

Answer: B) By looking at examples and data

11. **Why is AI important in education?**

A) It can play video games for students

B) It helps students learn at their own pace

C) It takes away teachers

D) It makes school harder

Answer: B) It helps students learn at their own pace

12. **What is an example of AI in video games?**

A) Making the game harder or easier based on your skill

B) Changing the color of the game screen

C) Turning off the game

D) Playing the game without you

Answer: A) Making the game harder or easier based on your skill

13. **What does a smart speaker do?**

A) It makes food

B) It plays music and answers questions

C) It cleans your room

D) It flies in the sky

Answer: B) It plays music and answers questions

14. **How does AI help in social media?**

A) By changing your friends' names

B) By showing you posts based on your likes

C) By taking pictures of you

D) By blocking all posts

Answer: B) By showing you posts based on your likes

15. **What can AI do in self-driving cars?**

A) Play music

B) Make coffee

C) Recognize traffic signs and stop at red lights

D) Talk to passengers

Answer: C) Recognize traffic signs and stop at red lights

16. **Why does AI need lots of data?**

A) To learn and improve its predictions

B) To make the computer more colorful

C) To make AI sleep

D) To make computers faster without learning

Answer: A) To learn and improve its predictions

17. **Which of the following is NOT a task AI can help with?**

A) Predicting the weather

B) Playing music

C) Drawing pictures

D) Cleaning your house

Answer: C) Drawing pictures

18. **How does AI help businesses?**

A) By making them close early

B) By helping them work faster and more efficiently

C) By asking them to take breaks

D) By making them tired

Answer: B) By helping them work faster and more efficiently

19. **What does AI use to make decisions?**

A) Emotions and feelings

B) Data and algorithms

C) Random guessing

D) Magic

Answer: B) Data and algorithms

20. **How does AI help with weather predictions?**

A) By making guesses

B) By analyzing past weather data

C) By looking outside

D) By asking people

Answer: B) By analyzing past weather data

21. **Why is AI called "cool"?**

A) It learns from mistakes and gets better

B) It has a big smile

C) It can fly

D) It can play games

Answer: A) It learns from mistakes and gets better

22. **What do smart speakers do?**

A) They cook your dinner

B) They play music and answer your questions

C) They clean your house

D) They sleep when you ask

Answer: B) They play music and answer your questions

23. **What does AI help do in search engines like Google?**

A) It makes search engines slower

B) It helps find the best search results

C) It makes people wait longer

D) It changes the search engine's colors

Answer: B) It helps find the best search results

24. **Which of the following is NOT a part of AI in our lives?**

A) Smart speakers

B) Self-driving cars

C) Regular bicycles

D) Online recommendations

Answer: C) Regular bicycles

25. **How can AI help you on social media?**

A) By showing you random posts

B) By ignoring what you like

C) By analyzing what you like and showing posts you might enjoy

D) By blocking all your friends

Answer: C) By analyzing what you like and showing posts you might enjoy

26. **How does AI help make video games fun?**

A) By making characters smarter and adjusting difficulty

B) By making the game slower

C) By blocking the player

D) By removing all the levels

Answer: A) By making characters smarter and adjusting difficulty

27. **What is one of the best things AI can do for businesses?**

A) Help them take naps

B) Help them make decisions based on data

C) Help them stop working

D) Help them buy products

Answer: B) Help them make decisions based on data

28. **What can AI help with in healthcare?**

A) Playing games

B) Analyzing patient data to improve treatments

C) Cooking food

D) Writing books

Answer: B) Analyzing patient data to improve treatments

29. **How does AI help you when you ask it questions?**

A) By ignoring your voice

B) By analyzing your voice and giving you the right answer

C) By guessing the answer

D) By playing a game

Answer: B) By analyzing your voice and giving you the right answer

30. **Why is it important for AI to have data?**

A) To make it smarter and learn new things

B) To make it run faster

C) To make it look colorful

D) To make it sleep

Answer: A) To make it smarter and learn new things

31. **What does AI use to learn?**

A) Candy

B) Data

C) Books

D) Colors

Answer: B) Data

32. **Which of the following is an example of AI?**

A) Bicycle

B) A robot that helps with cleaning

C) A pencil

D) A toy car

Answer: B) A robot that helps with cleaning

33. **What is AI good at?**

A) Making friends

B) Understanding animals

C) Learning from lots of data

D) Talking to other robots

Answer: C) Learning from lots of data

34. **How does AI understand what you want?**

A) By guessing

B) By reading your mind

C) By listening to what you say

D) By asking others

Answer: C) By listening to what you say

35. **Which device uses AI to play music when you ask?**

A) A phone

B) A smart speaker

C) A lamp

D) A television

Answer: B) A smart speaker

36. **How does AI help in games?**

A) It plays the game for you

B) It makes the game too hard

C) It changes the rules of the game

D) It makes characters smarter

Answer: D) It makes characters smarter

37. **Why do smart speakers use AI?**

A) To talk like a human

B) To play music and answer questions

C) To make food

D) To tell jokes

Answer: B) To play music and answer questions

38. **What is one thing AI can do in a self-driving car?**

A) Sleep

B) Stop at red lights

C) Play games

D) Make food

Answer: B) Stop at red lights

39. **How does AI learn from data?**

A) By looking at patterns

B) By playing games all day

C) By talking to humans

D) By guessing the answers

Answer: A) By looking at patterns

40. **What is one thing AI can help predict?**

A) What will happen tomorrow

B) The color of the sky

C) The weather

D) The time on a clock

Answer: C) The weather

41. **How can AI be used to make shopping easier?**

A) By guessing what you like

B) By making you buy random things

C) By telling you to shop for long hours

D) By taking away all your money

Answer: A) By guessing what you like

42. **Why is AI useful for finding information online?**

A) It makes your computer work slower

B) It helps search engines find what you need faster

C) It gives you the wrong answers

D) It shuts off the computer

Answer: B) It helps search engines find what you need faster

43. **How can AI improve video games?**

A) By making the game too easy

B) By adjusting the game's difficulty

C) By making the game slow

D) By removing all the characters

Answer: B) By adjusting the game's difficulty

44. **How does AI help with language translation?**

A) By guessing words

B) By learning different languages

C) By making up new words

D) By stopping the translation process

Answer: B) By learning different languages

45. **What does personalization mean in AI?**

A) Making everything the same for everyone

B) Changing everything randomly

C) Giving suggestions based on what you like

D) Ignoring your choices

Answer: C) Giving suggestions based on what you like

46. **What happens when AI gets better at learning from data?**

A) It forgets everything

B) It can make smarter decisions

C) It stops working

D) It becomes confused

Answer: B) It can make smarter decisions

47. What is a chatbot?

A) A robot that walks around

B) A program that talks to you online

C) A machine that makes music

D) A game you play with friends

Answer: B) A program that talks to you online

48. **What is the main job of AI in a search engine like Google?**

A) To make your computer slower

B) To find the best information quickly

C) To make you wait longer for results

D) To play games with you

Answer: B) To find the best information quickly

49. **How does AI help in social media?**

A) By showing you random posts

B) By showing posts that match your interests

C) By making you stop using it

D) By deleting all posts

Answer: B) By showing posts that match your interests

50. **How does AI recognize objects in pictures?**

A) By guessing

B) By looking at many examples of objects

C) By waiting for a human to tell it

D) By copying other pictures

Answer: B) By looking at many examples of objects

51. **What does AI need to make better decisions?**

A) A lot of data

B) A lot of food

C) A lot of sleep

D) A lot of colors

Answer: A) A lot of data

52. **What is a smart thermostat?**

A) A device that can talk to you

B) A device that controls the temperature at home

C) A device that makes phone calls

D) A device that makes snacks

Answer: B) A device that controls the temperature at home

53. **How can AI help in education?**

A) By teaching math

B) By making personalized learning for each student

C) By doing homework for students

D) By playing games instead of studying

Answer: B) By making personalized learning for each student

54. **Why does AI need a lot of data to learn?**

A) So it can get smarter

B) So it can guess better

C) So it can play games

D) So it can talk louder

Answer: A) So it can get smarter

55. **What do self-driving cars use to see the road?**

A) Human drivers

B) Special sensors and cameras

C) A map

D) A flashlight

Answer: B) Special sensors and cameras

56. **How does AI make decisions in games?**

A) By guessing randomly

B) By following the rules of the game

C) By asking the players

D) By making up new rules

Answer: B) By following the rules of the game

57. **What is one way AI can help with healthcare?**

A) By making the doctor disappear

B) By giving medicine to patients

C) By helping doctors understand patient data

D) By making patients sleep

Answer: C) By helping doctors understand patient data

58. **How can AI help in music apps?**

A) By making random suggestions

B) By playing any song without asking

C) By suggesting songs based on what you like

D) By making you sing the song

Answer: C) By suggesting songs based on what you like

59. **What can AI do in a robot?**

A) Make it play games

B) Help it clean the house

C) Help it sleep

D) Help it stop working

Answer: B) Help it clean the house

60. **How does AI make your phone smarter?**

A) By playing music all day

B) By remembering your preferences and helping you find what you need

C) By sending random texts

D) By turning off your phone

Answer: B) By remembering your preferences and helping you find what you need

61. **What is one task that AI can do for you in a game?**

A) Win the game for you

B) Create new levels in the game

C) Help you find the best strategy to play

D) Make the game stop working

Answer: C) Help you find the best strategy to play

62. **How does AI help in recognizing your face on your phone?**

A) By guessing your name

B) By using special facial recognition software

C) By making you smile

D) By asking your friends

Answer: B) By using special facial recognition software

63. **What is a virtual assistant like Siri or Alexa?**

A) A robot that plays games

B) A computer program that helps you with tasks

C) A toy that talks

D) A smartphone with a camera

Answer: B) A computer program that helps you with tasks

64. **What is an example of AI helping with your homework?**

A) It does all your homework for you

B) It gives suggestions for answers or research

C) It writes your name on the paper

D) It puts your homework in a folder

Answer: B) It gives suggestions for answers or research

65. **How does AI help in shopping online?**

A) It buys random things for you

B) It shows you items based on what you like or search for

C) It chooses the color of clothes for you

D) It makes the prices higher

Answer: B) It shows you items based on what you like or search for

66. **How does AI help you find your way in an unfamiliar place?**

A) By telling you to go in any direction

B) By using GPS to give directions

C) By making you walk longer

D) By making the map disappear

Answer: B) By using GPS to give directions

67. **What can AI do in a smart home?**

A) Turn off the lights and control appliances automatically

B) Make the house bigger

C) Change the weather outside

D) Talk to the neighbors

Answer: A) Turn off the lights and control appliances automatically

68. **How can AI help you in learning a new language?**

A) By teaching you random words

B) By using apps or programs to practice speaking and listening

C) By making up new words

D) By making you memorize everything at once

Answer: B) By using apps or programs to practice speaking and listening

69. **What is a robot that can play soccer?**

A) A robot that watches TV

B) A robot that helps in the kitchen

C) A robot that plays soccer like humans

D) A robot that sits on the couch

Answer: C) A robot that plays soccer like humans

70. **How does AI help with voice recognition?**

A) By guessing your voice

B) By using patterns from your voice to understand what you're saying

C) By making funny noises

D) By ignoring your voice

Answer: B) By using patterns from your voice to understand what you're saying

71. **What is the main purpose of AI in a weather app?**

A) To make the app colorful

B) To guess what will happen tomorrow

C) To help predict the weather based on past data

D) To stop the weather forecast from updating

Answer: C) To help predict the weather based on past data

72. **How does AI help self-driving cars stay safe?**

A) By using sensors and cameras to see the road and obstacles

B) By guessing what's on the road

C) By asking people to drive for them

D) By using a map without looking at the road

Answer: A) By using sensors and cameras to see the road and obstacles

73. **What is one thing AI can do in a smart refrigerator?**

A) Make food

B) Keep the door open

C) Help manage food inventory and suggest recipes

D) Eat the food for you

Answer: C) Help manage food inventory and suggest recipes

74. **How does AI help in the medical field?**

A) By making the doctor disappear

B) By helping doctors diagnose diseases and understand patient data

C) By making you feel sick

D) By giving you medicine without asking

Answer: B) By helping doctors diagnose diseases and understand patient data

75. **What is one way AI can help with environmental problems?**

A) By making more pollution

B) By studying weather patterns and helping prevent disasters

C) By ignoring the environment

D) By making the Earth smaller

Answer: B) By studying weather patterns and helping prevent disasters

76. **What does AI use to learn from its mistakes?**

A) A magic spell

B) A special program to correct errors and improve

C) A computer game

D) A book about errors

Answer: B) A special program to correct errors and improve

77. **What is an example of AI helping with shopping in a store?**

A) Helping you carry heavy bags

B) Helping you find the item you are looking for using a store map

C) Asking you to leave the store

D) Making everything more expensive

Answer: B) Helping you find the item you are looking for using a store map

78. **How can AI make your smartphone smarter?**

A) By taking selfies

B) By remembering your habits and helping you with useful apps

C) By making it larger

D) By playing games all day

Answer: B) By remembering your habits and helping you with useful apps

79. **What is an AI-powered recommendation system used for?**

A) To make random decisions for you

B) To suggest products, movies, or music you might like

C) To tell you jokes

D) To ignore your choices

Answer: B) To suggest products, movies, or music you might like

80. **How can AI help with cleaning your house?**

A) By telling you to clean

B) By moving objects around

C) By controlling a vacuum cleaner robot to clean your house

D) By making your house messy

Answer: C) By controlling a vacuum cleaner robot to clean your house

81. **How can AI help students study better?**

A) By giving random answers

B) By offering personalized study materials and quizzes

C) By making you skip homework

D) By taking away all your books

Answer: B) By offering personalized study materials and quizzes

82. **How does AI help in social media apps?**

A) By showing posts that you may like based on your past activities

B) By ignoring what you like

C) By taking away your photos

D) By showing random posts

Answer: A) By showing posts that you may like based on your past activities

83. **What does AI use to make better decisions?**

A) Data and patterns

B) Random guesses

C) Books only

D) Playing games

Answer: A) Data and patterns

84. **What can AI do in a factory?**

A) Make all the workers leave

B) Help control machines to make things more efficiently

C) Paint the walls

D) Sleep during the workday

Answer: B) Help control machines to make things more efficiently

85. **What is one thing AI can do in a music player?**

A) Change the lyrics of a song

B) Suggest songs based on your listening history

C) Make the music stop playing

D) Play random music that you might not like

Answer: B) Suggest songs based on your listening history

86. **How can AI improve the experience of playing video games?**

A) By changing the rules of the game every time

B) By making the characters behave like real people

C) By making the game too easy

D) By ignoring the players

Answer: B) By making the characters behave like real people

87. **How does AI recognize objects in pictures?**

A) By using special algorithms to identify objects

B) By making random guesses

C) By asking someone to describe the picture

D) By taking a photo of the object

Answer: A) By using special algorithms to identify objects

88. **What is one way AI can help in movies?**

A) By making the actors disappear

B) By helping create special effects

C) By making the movie too long

D) By writing the entire script

Answer: B) By helping create special effects

89. **How can AI help with personalizing your online experience?**

A) By making everything the same for everyone

B) By offering recommendations based on your preferences

C) By showing random things

D) By stopping your activities

Answer: B) By offering recommendations based on your preferences

90. **What can AI do in a self-checkout machine at the store?**

A) Ask you to leave the store

B) Help you scan and pay for items automatically

C) Make everything free

D) Hide the items you want to buy

Answer: B) Help you scan and pay for items automatically

91. What does AI use to recognize objects in videos?

A) It uses its own imagination

B) It looks at patterns and movement in the video

C) It guesses randomly

D) It asks people for help

Answer: B) It looks at patterns and movement in the video

92. How does AI help in detecting fraud in banks?

A) By giving out free money

B) By analyzing spending patterns and finding unusual activities

C) By making everyone rich

D) By ignoring bank transactions

Answer: B) By analyzing spending patterns and finding unusual activities

93. How can AI help doctors in a hospital?

A) By treating patients without any help

B) By analyzing medical data and helping doctors make decisions

C) By playing games with patients

D) By making patients feel uncomfortable

Answer: B) By analyzing medical data and helping doctors make decisions

94. What is one thing AI can do to improve transportation?

A) By making cars fly

B) By helping manage traffic and guiding vehicles on the best routes

C) By making the roads disappear

D) By making everyone walk instead

Answer: B) By helping manage traffic and guiding vehicles on the best routes

95. How does AI help in cooking recipes?

A) By making the food taste better without changing anything

B) By suggesting new recipes based on what ingredients you have

C) By cooking food for you automatically

D) By cleaning the kitchen for you

Answer: B) By suggesting new recipes based on what ingredients you have

96. What can AI do in a smart assistant like Alexa?

A) Make random sounds

B) Answer questions and control devices in your home

C) Watch movies

D) Sleep all day

Answer: B) Answer questions and control devices in your home

97. How does AI help with translation of languages?

A) By guessing the words

B) By using patterns and rules of the language to translate text or speech

C) By making random changes

D) By ignoring the language you speak

Answer: B) By using patterns and rules of the language to translate text or speech

98. What is one way AI can be used in education?

A) By telling jokes during class

B) By creating personalized learning programs for students

C) By making all students learn the same way

D) By making lessons shorter

Answer: B) By creating personalized learning programs for students

99. How does AI help robots learn new tasks?

A) By giving them a book to read

B) By letting them practice and improve through feedback

C) By telling them what to do all the time

D) By stopping them from moving

Answer: B) By letting them practice and improve through feedback

100. How does AI improve the experience of using voice-controlled devices?

A) By ignoring your voice

B) By understanding what you're saying and following your commands

C) By making your voice sound funny

D) By telling you to stop talking

Answer: B) By understanding what you're saying and following your commands

Open-Ended Questions

1. What do you think Artificial Intelligence is?
2. Can you name something in your daily life that might use AI?
3. How would you explain AI to a friend who has never heard of it?
4. Why do you think humans created AI?
5. How does AI help people in their everyday lives?
6. Can you describe AI in one simple sentence?
7. Why is AI called "artificial"?
8. How is AI different from regular machines or computers?
9. What AI technology do you think is the most helpful at home?
10. How do you think AI is used in schools?
11. What would your day be like if AI disappeared?
12. Can you think of any games you play that might use AI?
13. How is AI similar to humans?
14. What are some things humans can do that AI cannot?
15. Can you think of a task that AI might do better than humans? Why?
16. Do you think AI will ever have feelings like humans? Why or why not?
17. What do you think is easier for machines to decide, and why?
18. How are the decisions made by a machine different from a human's decisions?
19. Do you trust AI to make decisions for you? Why or why not?
20. If AI made a decision that you didn’t agree with, what would you do?

21. Imagine you have a robot helper at home. What task would you ask it to do, and why?
22. If an AI program gave you the wrong answer in your homework, how would you fix it?
23. A self-driving car needs to choose between stopping suddenly or hitting something in the road. What should it do, and why?
24. If your favorite game had an AI character that could learn from you, what would you teach it?
25. Imagine AI helping design your dream playground. What would you want it to include?
26. If an AI assistant could talk to animals, what would you ask to find out?
27. If an AI robot was your teacher for one day, how would the class be different?
28. If AI could create a new sport, what would it be like?
29. If an AI program could plan your birthday party, what theme would you want it to choose?
30. If AI could create a new ice cream flavor, what would you want it to invent?
31. What is the coolest thing about AI, in your opinion?
32. If you could invent an AI robot, what would it do?
33. Can AI make learning more fun? How?
34. How does AI figure out what to do?
35. Can you think of a time when AI "learned" something?
36. How does AI help humans solve problems?
37. How do you think AI learns to do new things?

38. Can AI make mistakes when learning?
39. What would you teach an AI robot if you had the chance?
40. Why do you think AI needs a lot of data to learn?
41. How do you think AI learns from examples?
42. If AI keeps practicing, can it become perfect? Why or why not?
43. What is your favorite AI technology? Why?
44. How do you think AI is used in shopping websites?
45. Why do self-driving cars need AI?
46. How do you think AI helps in making videos or movies?
47. Why do you think AI was created?
48. How do you think AI has changed since it was first invented?
49. What is the most important event in the history of AI, and why?
50. How do you think AI will change in the future?
