Dump's Outline: Grade 05 - 06

1. **What is AI**
   - Explanation of AI and Everyday Examples
2. **Types of AI**
   - Narrow AI
   - General AI
3. **How AI Makes Decisions**
   - Learning from Data and Examples
4. **AI in Various Industries**
   - Education, Agriculture, Healthcare
5. **Creativity with AI**
   - Practical Activity: AI Tools in Daily Life
6. **Basic Ethics of AI**
   - What is AI Ethics

Dump's Outline: Grade 05 - 06

1. **What is Artificial Intelligence (AI)?**

   A) The ability of machines to play games

   B) The ability of machines to perform tasks that require human intelligence

   C) The ability of machines to clean houses

   D) The ability of machines to cook food

   Answer: B) The ability of machines to perform tasks that require human intelligence

2. **Which of these is an example of AI?**

   A) A refrigerator

   B) A virtual assistant like Siri

   C) A pencil

   D) A car

   Answer: B) A virtual assistant like Siri

3. **What can AI help with in daily life?**

   A) Making homework harder

   B) Providing entertainment

   C) Making tasks easier and more efficient

   D) Creating food

   Answer: C) Making tasks easier and more efficient

4. **What does "Narrow AI" mean?**

   A) AI that can do everything like a human

   B) AI designed to do one specific task

   C) AI that can create art

   D) AI that helps people think

   Answer: B) AI designed to do one specific task

5. **Which of the following is an example of Narrow AI?**

   A) A robot that learns everything

   B) A chatbot answering customer questions

   C) A machine that learns to play all sports

   D) A computer that creates movies

   Answer: B) A chatbot answering customer questions

6. **What does General AI refer to?**

   A) Machines that can perform tasks like humans

   B) AI that is used for gaming only

   C) Machines that cannot learn anything

   D) A tool used for listening to music

   Answer: A) Machines that can perform tasks like humans

7. **How does AI make decisions?**

   A) By guessing randomly

   B) By using data to make choices

   C) By asking humans for help

   D) By sleeping and waiting

   Answer: B) By using data to make choices

8. Which of the following is used by AI to make decisions?

A) Random thoughts

B) Data collected from different sources

C) Asking a person for help

D) Guessing based on feelings

Answer: B) Data collected from different sources

9. Which example shows AI learning from data?

A) A child reading a book

B) A weather app predicting the forecast

C) A teacher giving homework

D) A human writing a story

Answer: B) A weather app predicting the forecast

10. What is AI used for in education?

A) To replace teachers

B) To make lessons boring

C) To provide personalized learning experiences

D) To stop students from learning

Answer: C) To provide personalized learning experiences

11. Which app uses AI for learning a new language?

A) Duolingo

B) Instagram

C) WhatsApp

D) Twitter

Answer: A) Duolingo

12. How does AI help teachers in schools?

A) By teaching everything

B) By keeping students busy

C) By giving personalized help to students

D) By playing games with students

Answer: C) By giving personalized help to students

13. How can AI help farmers?

A) By planting seeds automatically

B) By giving advice on when to plant crops

C) By picking fruit

D) By selling crops online

Answer: B) By giving advice on when to plant crops

14. Which of these AI tools can help doctors?

A) A video game

B) Medical imaging software

C) A cooking recipe app

D) A fitness tracker

Answer: B) Medical imaging software

15. What does AI use to predict the weather?

A) Satellites and weather stations

B) Listening to people talk

C) Watching TV

D) Reading books

Answer: A) Satellites and weather stations

16. What is an example of AI helping farmers make decisions?

A) AI predicting crop prices

B) AI helping to plant crops

C) AI analyzing weather and soil data

D) AI buying seeds for the farm

Answer: C) AI analyzing weather and soil data

17. How does AI help online shopping?

A) By showing you random products

B) By analyzing your shopping behavior to suggest items

C) By taking money from your account

D) By keeping track of your expenses

Answer: B) By analyzing your shopping behavior to suggest items

18. Which of the following is an example of creativity with AI?

A) AI making music

B) AI cleaning your room

C) AI playing video games

D) AI writing emails

Answer: A) AI making music

19. Can AI create art?

A) Yes

B) No

C) Only human artists can create art

D) Only humans can enjoy art

Answer: A) Yes

20. What does AI use to create music or art?

A) Human creativity

B) Algorithms and data

C) Random guessing

D) Watching TV shows

Answer: B) Algorithms and data

21. How is AI used in healthcare?

A) To analyze medical images

B) To provide entertainment

C) To replace doctors

D) To sell medicines

Answer: A) To analyze medical images

22. How does AI help with health apps?

A) By playing games

B) By helping people track their health

C) By cooking meals

D) By writing stories

Answer: B) By helping people track their health

23. Why is it important to consider AI ethics?

A) To make AI smarter

B) To ensure AI is used fairly and responsibly

C) To create more games

D) To teach AI to play sports

Answer: B) To ensure AI is used fairly and responsibly

24. What is one ethical concern with AI?

A) AI cannot make decisions

B) AI can collect personal data about people

C) AI only works with toys

D) AI does not use data

Answer: B) AI can collect personal data about people

25. What does AI need to perform tasks?

A) A computer only

B) Data to learn from

C) Random information

D) A teacher to tell it what to do

Answer: B) Data to learn from

26. What is "training" in AI?

A) Teaching humans how to use AI

B) Giving AI data to help it learn

C) Making AI do physical exercises

D) Watching movies with AI

Answer: B) Giving AI data to help it learn

27. Why is AI useful in weather prediction?

A) It can read the weather like a book

B) It helps people to play sports

C) It analyzes data from weather stations

D) It makes decisions without any data

Answer: C) It analyzes data from weather stations

28. What do AI virtual assistants use to understand you?

A) Robots

B) Magic

C) AI algorithms

D) Computers

Answer: C) AI algorithms

29. How does AI help online shopping?

A) By organizing your cart

B) By showing random advertisements

C) By analyzing shopping data to recommend products

D) By selling products for you

Answer: C) By analyzing shopping data to recommend products

30. What does AI in agriculture help with?

A) Telling jokes to farmers

B) Planting seeds automatically

C) Predicting weather for crops

D) Cleaning the farm

Answer: C) Predicting weather for crops

31. How does AI work in education?

A) By making students bored

B) By teaching students the same way

C) By personalizing lessons for students

D) By giving students too much homework

Answer: C) By personalizing lessons for students

32. What is one benefit of using AI in health apps?

A) It helps you play games

B) It reminds you to take your medicine

C) It gives you recipes for cooking

D) It takes care of pets

Answer: B) It reminds you to take your medicine

33. Which of the following can be created using AI?

A) Robots that do homework

B) Music and art

C) Computers that cook

D) Books with no authors

Answer: B) Music and art

34. How does AI help doctors?

A) By performing surgeries

B) By analyzing medical images for diseases

C) By giving advice on fashion

D) By cooking meals

Answer: B) By analyzing medical images for diseases

35. **Which tool helps farmers with crop management?**

A) AI predicting crop prices

B) AI analyzing weather and soil data

C) AI making farm decisions for you

D) AI selling crops online

Answer: B) AI analyzing weather and soil data

36. **What is an example of Narrow AI?**

A) Teaching a dog to fetch

B) AI that plays chess

C) AI that can learn any task like a human

D) AI that reads books

Answer: B) AI that plays chess

37. **What is General AI?**

A) Machines that can perform specific tasks

B) Machines that can understand and learn like humans

C) Machines that play games

D) Machines that make movies

Answer: B) Machines that can understand and learn like humans

38. **Which of the following is a type of data that AI can use to learn?**

A) Only text

B) Only pictures

C) Only sound

D) Text, pictures, and sound

Answer: D) Text, pictures, and sound

39. **How does AI help virtual assistants like Siri or Google Assistant?**

A) By giving weather updates only

B) By understanding and responding to your voice

C) By making calls for you

D) By cooking food for you

Answer: B) By understanding and responding to your voice

40. **What does AI use to make predictions?**

A) Random guesses

B) Data that it has learned from

C) Your personal choices

D) Superheroes' advice

Answer: B) Data that it has learned from

41. **How does AI help farmers decide when to plant crops?**

A) By randomly choosing a date

B) By analyzing weather data

C) By guessing when it will rain

D) By asking the farmers

Answer: B) By analyzing weather data

42. **Which of the following is an AI tool used in healthcare?**

A) A stethoscope

B) A medical imaging software

C) A calculator

D) A thermometer

Answer: B) A medical imaging software

43. **What is the role of AI in healthcare?**

A) To make hospital food

B) To help doctors find diseases quickly

C) To perform surgeries

D) To replace doctors

Answer: B) To help doctors find diseases quickly

44. **Which of these is a type of art AI can create?**

A) Only drawings

B) Only photos

C) Both drawings and paintings

D) Only music

Answer: C) Both drawings and paintings

45. **Which of the following best describes how AI works in decision-making?**

A) By making random guesses

B) By using data it has learned from

C) By asking humans for help

D) By doing nothing

Answer: B) By using data it has learned from

46. **How does AI help in education?**

A) By replacing teachers

B) By helping students with their homework

C) By providing personalized learning experiences

D) By making school work harder

Answer: C) By providing personalized learning experiences

47. **What is an example of AI helping farmers?**

A) Giving free seeds

B) Deciding when to harvest crops

C) Helping farmers make decisions based on weather data

D) Picking vegetables

Answer: C) Helping farmers make decisions based on weather data

48. **What can AI do to improve the shopping experience?**

A) Tell you what to buy

B) Suggest products based on what you like or have bought before

C) Send you advertisements

D) Change the price of items

Answer: B) Suggest products based on what you like or have bought before

49. **How does AI make weather forecasts?**

A) By watching the clouds

B) By guessing

C) By analyzing weather data and patterns

D) By asking people what the weather is like

Answer: C) By analyzing weather data and patterns

50. **What does the term "training" mean in AI?**

A) Teaching a machine to perform tasks by feeding it data

B) Preparing a machine for a race

C) Making the machine learn by watching movies

D) Giving the machine a test

Answer: A) Teaching a machine to perform tasks by feeding it data

51. **How does AI help in agriculture?**

A) By harvesting crops

B) By analyzing weather and soil data for better crop decisions

C) By planting seeds

D) By selling the crops

Answer: B) By analyzing weather and soil data for better crop decisions

52. **Which of the following is a way AI is used in healthcare?**

A) To take blood tests

B) To replace doctors

C) To analyze X-rays and medical images

D) To give vaccines

Answer: C) To analyze X-rays and medical images

53. **How does AI contribute to making online learning better?**

A) By watching videos

B) By helping students learn at their own pace

C) By reducing the number of lessons

D) By making teachers do less work

Answer: B) By helping students learn at their own pace

54. **What can AI help farmers track?**

A) Their health

B) The weather and water usage

C) The prices of vegetables

D) Their social media posts

Answer: B) The weather and water usage

55. **How can AI assist in improving health apps?**

A) By making the apps colorful

B) By helping people track their health and remind them to take medicine

C) By making random suggestions

D) By playing games

Answer: B) By helping people track their health and remind them to take medicine

56. **What is a benefit of AI in education?**

A) Making learning harder

B) Giving personalized help to students

C) Taking over teacher jobs

D) Reducing homework

Answer: B) Giving personalized help to students

57. **What does AI do with the data it collects?**

A) Throws it away

B) Analyzes it to make decisions or predictions

C) Sells it to companies

D) Shares it with friends

Answer: B) Analyzes it to make decisions or predictions

58. **What is the main function of a virtual assistant like Siri?**

A) To play music

B) To help with homework

C) To understand and respond to voice commands

D) To cook food

Answer: C) To understand and respond to voice commands

59. **Which of the following tasks can AI perform?**

A) Help diagnose diseases

B) Perform surgery

C) Cook meals

D) Take care of pets

Answer: A) Help diagnose diseases

60. **How does AI use algorithms?**

A) It follows a set of rules or instructions to process data

B) It creates music

C) It tells jokes

D) It writes books

Answer: A) It follows a set of rules or instructions to process data

61. **What is AI's role in agriculture?**

A) To water crops

B) To provide weather predictions and manage resources

C) To harvest vegetables

D) To sell crops

Answer: B) To provide weather predictions and manage resources

62. **How does AI help healthcare professionals?**

A) By diagnosing diseases

B) By taking medical exams

C) By doing surgery

D) By filling prescriptions

Answer: A) By diagnosing diseases

63. **What is a potential ethical concern with AI?**

A) AI can be too smart

B) AI might be used in unfair ways

C) AI will not work properly

D) AI cannot play games

Answer: B) AI might be used in unfair ways

64. **What is one way AI helps farmers save resources?**

A) By predicting the best times to harvest

B) By growing crops faster

C) By using water and resources more efficiently

D) By harvesting crops at night

Answer: C) By using water and resources more efficiently

65. **What can AI do in the field of creativity?**

A) Play games

B) Create artwork and music

C) Solve math problems

D) Watch TV shows

Answer: B) Create artwork and music

66. **How do virtual assistants use AI?**

A) They can write stories

B) They can follow voice commands

C) They can predict the weather

D) They play games for you

Answer: B) They can follow voice commands

67. **What is one way AI helps in weather forecasting?**

A) By analyzing weather data from satellites and weather stations

B) By watching the sky

C) By guessing

D) By sending you messages about the weather

Answer: A) By analyzing weather data from satellites and weather stations

68. **How does AI help improve customer service in businesses?**

A) By sending advertisements

B) By offering customer support through chatbots

C) By selling products

D) By making deliveries

Answer: B) By offering customer support through chatbots

69. **What is one thing AI can do in education?**

A) Teach students how to play games

B) Personalize learning for students based on their needs

C) Replace teachers completely

D) Give students homework

Answer: B) Personalize learning for students based on their needs

70. **How does AI help in farming decisions?**

A) By making random decisions

B) By analyzing data to determine the best time for planting and harvesting

C) By making crops grow faster

D) By picking vegetables

Answer: B) By analyzing data to determine the best time for planting and harvesting

71. **What is the primary function of AI in self-driving cars?**

A) To play music for passengers

B) To control the car's speed and steering

C) To take pictures of the road

D) To clean the car

Answer: B) To control the car's speed and steering

72. **Which of the following is an example of AI in entertainment?**

A) Making movies using CGI

B) AI-powered movie recommendations

C) Playing board games

D) Writing news articles

Answer: B) AI-powered movie recommendations

73. **What is machine learning a part of?**

A) Mathematics

B) Artificial intelligence

C) Biology

D) Geography

Answer: B) Artificial intelligence

74. **How does AI assist in sports analytics?**

A) By calculating scores

B) By predicting team performance based on data

C) By writing match reports

D) By playing the game

Answer: B) By predicting team performance based on data

75. **How can AI be used in disaster response?**

A) By predicting natural disasters and guiding evacuation plans

B) By watching videos of disasters

C) By making decisions randomly

D) By sending supplies to disaster areas

Answer: A) By predicting natural disasters and guiding evacuation plans

76. **What does "neural network" mean in the context of AI?**

A) A type of computer game

B) A network of artificial neurons that mimics how the human brain works

C) A network of computers connected to the internet

D) A social media platform

Answer: B) A network of artificial neurons that mimics how the human brain works

77. **Which of the following is an example of AI in healthcare?**

A) A robot that plays music

B) An AI that analyzes medical records for patterns

C) An AI that makes coffee

D) An AI that helps with house cleaning

Answer: B) An AI that analyzes medical records for patterns

78. **What type of data does AI need to make predictions?**

A) Only text data

B) Only image data

C) Data from various sources, such as text, images, and numbers

D) Random data

Answer: C) Data from various sources, such as text, images, and numbers

79. **What is the role of AI in facial recognition?**

A) To predict the weather

B) To identify faces in images or videos

C) To create artwork

D) To play games

Answer: B) To identify faces in images or videos

80. **What is a chatbot powered by AI?**

A) A robot that cleans your house

B) A virtual assistant that can talk and answer questions

C) A device that makes phone calls

D) A machine that makes food

Answer: B) A virtual assistant that can talk and answer questions

81. **Which of the following is a field where AI is applied?**

A) Farming

B) Sports analytics

C) Healthcare

D) All of the above

Answer: D) All of the above

82. **How does AI use data to improve over time?**

A) By forgetting all previous information

B) By learning from the data and adjusting its responses

C) By repeating the same tasks over and over again

D) By asking humans for help every time

Answer: B) By learning from the data and adjusting its responses

83. **What is a popular use of AI in social media?**

A) Creating advertisements automatically

B) Writing posts for users

C) Sorting posts and showing personalized content

D) Making phone calls

Answer: C) Sorting posts and showing personalized content

84. **How does AI help in language translation?**

A) By translating words directly without understanding the meaning

B) By using data to understand the context and translate accurately

C) By guessing what words mean

D) By sending messages to people who speak other languages

Answer: B) By using data to understand the context and translate accurately

85. **What is the purpose of AI in cybersecurity?**

A) To replace cybersecurity experts

B) To analyze patterns and detect threats in data systems

C) To watch videos of hackers

D) To make cybersecurity fun

Answer: B) To analyze patterns and detect threats in data systems

86. **What type of machine learning helps AI to classify images?**

A) Supervised learning

B) Unsupervised learning

C) Reinforcement learning

D) Random learning

Answer: A) Supervised learning

87. **How does AI improve search engines like Google?**

A) By predicting your search queries

B) By making search results random

C) By displaying only ads

D) By removing all websites

Answer: A) By predicting your search queries

88. **What is the role of AI in autonomous drones?**

A) To make the drone fly randomly

B) To help the drone navigate and perform tasks without human control

C) To create drone designs

D) To clean the drones

Answer: B) To help the drone navigate and perform tasks without human control

89. **What is "deep learning" in AI?**

A) A way AI can think like a human

B) A way to teach AI to recognize patterns and make decisions

C) A method of cleaning data

D) A type of hardware used for AI

Answer: B) A way to teach AI to recognize patterns and make decisions

90. **How does AI contribute to e-commerce?**

A) By predicting customer preferences and suggesting products

B) By designing websites

C) By making payments for customers

D) By checking out items for customers

Answer: A) By predicting customer preferences and suggesting products

91. **What is an ethical concern with AI in decision-making?**

A) AI making all decisions without human input

B) AI being able to learn too quickly

C) AI only working in certain countries

D) AI being unable to solve problems

Answer: A) AI making all decisions without human input

92. **What is the purpose of reinforcement learning in AI?**

A) To reward AI for guessing correctly and punish it for mistakes

B) To make AI learn through trial and error

C) To teach AI to play games

D) To teach AI to read books

Answer: B) To make AI learn through trial and error

93. **How does AI help with personalized learning in education?**

A) By giving all students the same work

B) By adjusting lessons to fit each student's learning style

C) By making students learn faster

D) By removing homework

Answer: B) By adjusting lessons to fit each student's learning style

94. **Which of these tasks is NOT typically done by AI?**

A) Automating repetitive tasks

B) Writing human-like text

C) Making random guesses without any learning

D) Analyzing large amounts of data

Answer: C) Making random guesses without any learning

95. **Which of the following describes AI's role in autonomous vehicles?**

A) To play music for passengers

B) To help the vehicle drive itself safely

C) To replace human drivers with robots

D) To paint the vehicle

Answer: B) To help the vehicle drive itself safely

96. **How does AI help in creating music?**

A) By randomly picking notes

B) By using patterns and algorithms to generate melodies

C) By listening to popular songs

D) By playing instruments

Answer: B) By using patterns and algorithms to generate melodies

97. **What does "natural language processing" in AI do?**

A) It helps AI understand and respond to human language

B) It teaches AI how to play games

C) It allows AI to speak in different languages

D) It makes AI learn to draw

Answer: A) It helps AI understand and respond to human language

98. **How does AI assist in video recommendations on platforms like YouTube?**

A) By guessing what you might like based on your past activities

B) By showing random videos

C) By following a strict schedule

D) By recommending ads only

Answer: A) By guessing what you might like based on your past activities

99. **What can AI do to improve customer service in a call center?**

A) Listen to music

B) Answer customer questions and solve problems quickly

C) Make phone calls to customers

D) Ignore customer complaints

Answer: B) Answer customer questions and solve problems quickly

100. **What role does AI play in smart home devices?**

A) It makes the devices work on their own without your control

B) It helps the devices learn and adapt to your preferences

C) It controls the devices manually for you

D) It keeps the devices turned off

Answer: B) It helps the devices learn and adapt to your preferences

Open-Ended Questions

1. How would you explain AI to someone who has never heard of it before?
2. Why is AI called "intelligence"?
3. Can you name three ways AI is different from a regular computer program?
4. What do you think is the most important thing AI can do?
5. Why do you think people created AI?
6. Can you name an example of AI that you use every day? How does it help you?
7. What makes AI special compared to other machines?
8. If you could add AI to something in your home, what would it be, and why?
9. How do you think AI is used in games or apps you enjoy?
10. Imagine a world without AI. How would your life change?
11. What is Narrow AI, and can you give an example of it?
12. If General AI existed, how do you think it would be different from Narrow AI?
13. Why do you think General AI is harder to create than Narrow AI?
14. Can Narrow AI ever do something dangerous? How should we prevent it?
15. If you could create General AI, what would you want it to learn first?
16. How does AI use data to make decisions?
17. Why do you think AI needs so much information to work?
18. What should AI do if it has to choose between two equally good options?

19. Can AI make better decisions than humans? Why or why not?
20. If AI makes a wrong decision, who should fix it and how?
21. How does AI learn from examples?
22. Why do you think AI gets better the more it practices?
23. Can AI learn something bad from its data? How can we avoid this?
24. If you were teaching AI to recognize animals, what examples would you give it?
25. Why is it important for AI to learn from many different examples?
26. How do you think AI is used in schools to help students and teachers?
27. Imagine you are a farmer. How could AI make your work easier?
28. If you were a doctor, how would you use AI to help your patients?
29. How is AI helping scientists discover new things?
30. Can AI help solve big problems like climate change? How?
31. How do you think AI can be creative, like making art or music?
32. If you could ask AI to design something for you, what would it be?
33. How does AI know what kind of story or picture you might like?
34. Do you think AI can ever be as creative as humans? Why or why not?
35. If an AI made a new invention, would you call it the AI's idea or the human programmer's?
36. If you could use an AI tool to help you with school, what would it do?
37. How do you think AI helps people shop online?
38. Suppose an AI app that helps you organize your day. What features should it have?

39. Can AI make transportation, like buses or trains, work better? How?
40. How do you think AI helps people stay healthy and exercise?
41. Why is it important to make sure AI is fair to everyone?
42. If AI made a mistake that hurt someone, whose fault would it be?
43. Should AI always tell people it's a machine, not a human? Why or why not?
44. Can AI ever replace people's jobs? How can we make this fair for everyone?
45. What do you think is the biggest rule AI should always follow?
46. Suppose an AI robot helps at a zoo. If it sees a visitor doing something unsafe, what should it do?
47. A self-driving car must choose between stopping suddenly or hitting something in the road. What should it do, and why?
48. You are using an AI tutor, and it gives you the wrong answer. How would you handle the situation?
49. An AI app tracks how much screen time you have. How could it help you develop healthier habits?
50. Suppose an AI scientist creates a new type of food. What questions would you ask to make sure it's safe?
